ABOUT ME

Software and AI Engineer with hands-on experience in **full-stack development, AI automation, and cloud-based application deployment**. Experienced in building responsive applications with **React and Flutter**, backend systems with **Node.js**, and AI-driven solutions using **computer vision, LLMs, and workflow automation**. Strong interest in **AI agents, prompt engineering, and AI-assisted product development**, with a focus on turning ideas into practical software solutions.

PROJECTS

AI-Powered Interactive Surface for Smartboard Replacement

11/2024 – 8/2025

Ai engineer / software engineer

Developed an AI-powered interactive surface that transforms projected displays into smart interfaces using computer vision and gesture detection. Enabled real-time user interaction while demonstrating strong capabilities in AI-driven hardware integration and practical product design. Currently in the patent process, reflecting the project's originality and innovation.

Technologies: Python, Python, OpenCV, TensorFlow, Arduino IDE, Flask, .NET, YOLO, PyTorch

Customer segmentation

3/2025 - 3/2025

Data analyst

Performed customer segmentation analysis on mall customer data to identify behavior-based customer groups. Applied clustering techniques to uncover patterns and generate insights that support better understanding of customer profiles.

Technologies: Python, Pandas, Scikit-learn, Data Analysis

Syrian Conflict Data Analysis

4/2025 - 4/2025

Data analyst

Conducted temporal and spatial analysis of ACLED conflict data to examine escalation phases, fatality trends, and regional impact patterns in the Syrian conflict. Produced data-driven insights through structured analysis and visualization.

Technologies: Python, Pandas, Data Analysis, Data Visualization

Movie Revenue Prediction

6/2025 - 7/2025

Data analyst / Machine learning

Developed machine learning models to forecast box office revenue and classify movie profitability using diverse datasets. Addressed financial data challenges and supported the work with a research paper that received strong academic feedback.

Technologies: Python, Pandas, Scikit-learn, Machine Learning

Bike sharing in Washington dc

5/2025 - 6/2025

Data analyst / Machine learning

Analyzed bike-sharing data to identify patterns in daily usage, weather effects, and high-activity zones. Generated insights into urban mobility trends and user behavior through data analysis and visualization.

Technologies: Python, Pandas, Data Analysis, Data Visualization

E-commerce

3/2023 – 8/2023

Frontend developer

Built a mobile e-commerce application using Flutter, featuring authentication, product browsing, and checkout functionality. Combined mobile development, backend integration, and UX-focused design to deliver a complete user-centered product.

Technologies: Flutter, Figma, Api integration

Score – Employee management system powered by Ai

3/2024 - 8/2024

Frontend devloper / UIUX designer / Ai Engineer

Developed an employee management platform with a React frontend and Laravel backend, focused on CRUD operations and workflow efficiency. Integrated an AI-powered scoring system using face recognition and employee tracking to evaluate employee activity during work hours.

Technologies: YOLO, DeepFace, React, Figma, Laravel, Flask

FinOps Cloud Cost Management Platform

Full-Stack Developer

12/2025 - 3/2026

Developed a multi-cloud FinOps platform for a real client to monitor and analyze infrastructure spending across **GCP and Azure**. Built a **React frontend** with a **Node.js backend** and **Cloud SQL database** to visualize cost and usage insights. Deployed the backend using **Google Cloud Run** and managed the database with **Cloud SQL**, gaining hands-on experience with cloud deployment and infrastructure management.

Technologies: React, Node.js, Cloud SQL, Cloud Run, GCP, Azure, Loveable

SLA Monitoring & Ticketing Analytics Dashboard

11/2025 - 1/2026

Full-Stack Developer

Built an internal dashboard to track **SLA compliance and ticketing performance analytics**. Implemented a **React interface** with a **Node.js backend** to aggregate and visualize operational metrics. Deployed the backend on **Google Cloud Run** with **Cloud SQL** for data storage, strengthening practical experience in cloud-based application deployment.

Technologies: React, Node.js, GCP, Cloud Run, Cloud SQL

AI-Powered Document Generation System

1/2026 - 3/2026

AI Engineer / Automation Engineer

Developed an AI automation system that generates **requirements, technical proposals, HLD, and LLD documents** from user prompts. Implemented automated workflows using **n8n** and integrated **Gemini AI** for structured document generation. Reduced manual documentation effort and standardized technical outputs.

Technologies: N8N, Gemini API, Prompt Engineering

Customer Support Automation Tool

1/2026 - 3/2026

Ai Engineer / Automation Engineer

Built an automation system to assist technicians in managing customer support tickets. Designed **n8n workflows** integrated with the company's ticketing system to automate repetitive support tasks and provide assistance during ticket resolution. Improved response efficiency and reduced manual workload.

Technologies: N8N, API Integrations, Automation

EDUCATION AND CERTIFICATES

- **Information Technology Engineering ITE | Damascus university**
- **Research & Innovation Exhibition Participation 2025 | Damascus University**
- **Deep Learning Specialization | Coursera**
- **Machine Learning | Coursera**
- **RISE-MICCAI Summer School 2025 | MICCAI Society**
- **UNRWA SparkTech participation 2025 | UNRWA**
- **FMEE Exhibition Participation 2025 | FMEE Committee**
- **Outstanding Project Award 2025 | Syrian Research and Publication Society**

EXPERIENCE

- **Internship – Machine Learning Specialization**
- **Internship – Data Science and Analysis**
- **AI Engineer**

CodeAlpha | October 2025
ElevvoPaths | November 2025
Digital Future | November 2025 – Present

SKILLS & INTERESTS

Skills:

- Python
 - Machine and Deep learning
 - UI-UX designer
 - React
 - Project management
 - Team Collaboration
 - Firebase
 - JavaScript
 - AI Automation
 - N8N
 - AI Agents
 - Prompt Engineering
 - Hardware Integration
 - Lovable
- Pandas
 - SQL
 - Flutter
 - Basics of Arduino software and circuit design
 - Version Control (Github+Gitlab+Codeberg)
 - Documentation
 - Time management
 - LLM Integration
 - Workflow Automation
 - API Integrations
 - Node.js
 - Cloud SQL
 - Google Cloud Platform (GCP)
 - AI-Assisted Development

Interests: AI | Data Science | Hardware and AI integration | Creative projects | UIUX designs | AI Automation | AI Agents | Full-Stack Development | Cloud Applications | Computer Vision | NLP | Hardware and AI Integration | AI-Assisted Product Development
